

## Electronic controlled climate comfort

This extremely high efficient rear compact unit has been developed for the N4426/3 (Centroliner Double Decker). 12 brush-less evaporator blowers guarantee optimal ventilation and climate comfort under all kind of conditions. As a box body for rear installation the HLK I-7 is easy to mount because it is not necessary to do a complicated cable layout even for refrigerant hoses. Because of direct access to

all components the HLK I-7 is absolutely service- friendly. The micro processor - controlling (CAN-bus) guarantees a modern operating and service comfort. With a soft start run for the condenser blower and the liquid magnetic valve this equipment is a well thought-out climate solution does not leave any desires open.

### Technical Data

Cooling capacity [W]	40.500
Cooling capacity [kcal/h]	34.800
Cooling capacity [BTU/h]	138.200
Heating capacity [Q 100]	41.000
Evaporator air capacity [m <sup>3</sup> /h]	11.200
Current draw at 24V [A]	150
Weight [kg]	256
Refrigerant	R134a

- CAN-bus with diagnosis connection
- Brush-less evaporator blowers in series
- Electronic soft start for condenser blower
- Liquid magnetic valve
- Electronic control for fresh air flaps

### Brushless evaporator blower as series standard
